The House of Wisdom - Jim Al-Khalili 2011-03-31

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

Lost Enlightenment - S. Frederick Starr 2015-06-02

The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S.

Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's

diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. Lost Enlightenment chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

The House of Islam - Ed Husain 2018-06-19

“Ed Husain has become one of the most vital Muslim voices in the world. The House of Islam could very well be his magnum opus.” -Reza Aslan, #1 New York Times bestselling author of *Zealot* “This should be compulsory reading.” -Peter Frankopan, author of the international bestseller *The Silk Roads Today*, Islam is to many in the West an alien force, with Muslims held in suspicion. Failure to grasp the inner workings of religion and geopolitics has haunted American foreign policy for decades and has been decisive in the new administration's controversial orders. The intricacies and shadings must be understood by the West not only to build a stronger, more harmonious relationship between the two cultures, but also for greater accuracy in predictions as to how current crises, such as the growth of ISIS, will develop and from where the next might emerge. The House of Islam addresses key questions and points of disconnection. What are the roots of the conflict between Sunni and Shi'a Muslims that is engulfing Pakistan and the Middle East? Does the Koran encourage the killing of infidels? The book thoughtfully explores the events and issues that have come from and contributed to the broadening gulf between Islam and the West, from the United States' overthrow of Iran's first democratically elected leader to the emergence of ISIS, from the declaration of a fatwa on Salman

Rushdie to the attack on the offices of Charlie Hebdo. Authoritative and engaging, Ed Husain leads us clearly and carefully through the nuances of Islam and its people, taking us back to basics to contend that the Muslim world need not be a stranger to the West, nor our enemy, but our peaceable allies.

Islam Through Western Eyes - Jonathan Lyons 2014-01-01

Despite the West's growing involvement in Muslim societies, conflicts, and cultures, its inability to understand or analyze the Islamic world threatens any prospect for East-West rapprochement. Impelled by one thousand years of anti-Muslim ideas and images, the West has failed to engage in any meaningful or productive way with the world of Islam. Formulated in the medieval halls of the Roman Curia and courts of the European Crusaders and perfected in the newsrooms of Fox News and CNN, this anti-Islamic discourse determines what can and cannot be said about Muslims and their religion, trapping the West in a dangerous, dead-end politics that it cannot afford. In *Islam Through Western Eyes*, Jonathan Lyons unpacks Western habits of thinking and writing about Islam, conducting a careful analysis of the West's grand totalizing narrative across one thousand years of history. He observes the discourse's corrosive effects on the social sciences, including sociology, politics, philosophy, theology, international relations, security studies, and human rights scholarship. He follows its influence on research, speeches, political strategy, and government policy, preventing the West from responding effectively to its most significant twenty-first-century challenges: the rise of Islamic power, the emergence of religious violence, and the growing tension between established social values and multicultural rights among Muslim immigrant populations. Through the intellectual "archaeology" of Michel Foucault, Lyons reveals the workings of this discourse and its underlying impact on our social, intellectual, and political lives. He then addresses issues of deep concern to Western readers—Islam and modernity, Islam and violence, and Islam and women—and proposes new ways of thinking about the Western relationship to the Islamic world.

[When Baghdad Ruled the Muslim World](#) - Hugh Kennedy 2005-05-10

Presents a history of the Abbasid dynasty, the founders of Baghdad, and discusses the politics, military conquests, court life, palace bureaucracy, culture, and arts which characterized the era.

Longing for the Lost Caliphate - Mona Hassan 2018-08-14

In the United States and Europe, the word "caliphate" has conjured historically romantic and increasingly pernicious associations. Yet the caliphate's significance in Islamic history and Muslim culture remains poorly understood. This book explores the myriad meanings of the caliphate for Muslims around the world through the analytical lens of two key moments of loss in the thirteenth and twentieth centuries. Through extensive primary-source research, Mona Hassan explores the rich constellation of interpretations created by religious scholars, historians, musicians, statesmen, poets, and intellectuals. Hassan fills a scholarly gap regarding Muslim reactions to the destruction of the Abbasid caliphate in Baghdad in 1258 and challenges the notion that the Mongol onslaught signaled an end to the critical engagement of Muslim jurists and intellectuals with the idea of an Islamic caliphate. She also situates Muslim responses to the dramatic abolition of the Ottoman caliphate in 1924 as part of a longer trajectory of transregional cultural memory, revealing commonalities and differences in how modern Muslims have creatively interpreted and reinterpreted their heritage. Hassan examines how poignant memories of the lost caliphate have been evoked in Muslim culture, law, and politics, similar to the losses and repercussions experienced by other religious communities, including the destruction of the Second Temple for Jews and the fall of Rome for Christians. A global history, *Longing for the Lost Caliphate* delves into why the caliphate has been so important to Muslims in vastly different eras and places.

The Great Arab Conquests - Hugh Kennedy 2010-12-09

A popular history of the Arab invasions that carved out an empire from Spain to China Today's Arab world was created at breathtaking speed. Whereas the Roman Empire took over 200 years to reach its fullest extent, the Arab armies overran the whole Middle East, North Africa and Spain within a generation. They annihilated the thousand-year-old

Persian Empire and reduced the Byzantine Empire to little more than a city-state based around Constantinople. Within a hundred years of the Prophet's death, Muslim armies destroyed the Visigoth kingdom of Spain, and crossed the Pyrenees to occupy southern France. This is the first popular English language account of this astonishing remaking of the political and religious map of the world. Hugh Kennedy's sweeping narrative reveals how the Arab armies conquered almost everything in their path. One of the few academic historians with a genuine talent for story telling, he offers a compelling mix of larger-than-life characters, battles, treachery and the clash of civilizations.

The Adventures of Ibn Battuta - Ross E. Dunn 2005

Ross Dunn's classic retelling of the travels of Ibn Battuta, a Muslim of the 14th century.

The Great Caliphs - Amira K. Bennison 2014-05-14

This endlessly informative history brings the classical Islamic world to life In this accessibly written history, Amira K. Bennison contradicts the common assumption that Islam somehow interrupted the smooth flow of Western civilization from its Graeco-Roman origins to its more recent European and American manifestations. Instead, she places Islamic civilization in the longer trajectory of Mediterranean civilizations and sees the 'Abbasid Empire (750–1258 CE) as the inheritor and interpreter of Graeco-Roman traditions. At its zenith the 'Abbasid caliphate stretched over the entire Middle East and part of North Africa, and influenced Islamic regimes as far west as Spain. Bennison's examination of the politics, society, and culture of the 'Abbasid period presents a picture of a society that nurtured many of the "civilized" values that Western civilization claims to represent, albeit in different premodern forms: from urban planning and international trade networks to religious pluralism and academic research. Bennison's argument counters the common Western view of Muslim culture as alien and offers a new perspective on the relationship between Western and Islamic cultures.

Aladdin's Lamp - John Freely 2010-03-09

Aladdin's Lamp is the fascinating story of how ancient Greek philosophy and science began in the sixth century B.C. and, during the next

millennium, spread across the Greco-Roman world, producing the remarkable discoveries and theories of Thales, Pythagoras, Hippocrates, Plato, Aristotle, Euclid, Archimedes, Galen, Ptolemy, and many others. John Freely explains how, as the Dark Ages shrouded Europe, scholars in medieval Baghdad translated the works of these Greek thinkers into Arabic, spreading their ideas throughout the Islamic world from Central Asia to Spain, with many Muslim scientists, most notably Avicenna, Alhazen, and Averroës, adding their own interpretations to the philosophy and science they had inherited. Freely goes on to show how, beginning in the twelfth century, these texts by Islamic scholars were then translated from Arabic into Latin, sparking the emergence of modern science at the dawn of the Renaissance, which climaxed in the Scientific Revolution of the seventeenth century.

[Pathfinders](#) - Jim Al-Khalili 2010-09-30

For over 700 years the international language of science was Arabic. In *Pathfinders*, Jim al-Khalili celebrates the forgotten pioneers who helped shape our understanding of the world. All scientists have stood on the shoulders of giants. But most historical accounts today suggest that the achievements of the ancient Greeks were not matched until the European Renaissance in the 16th century, a 1,000-year period dismissed as the Dark Ages. In the ninth-century, however, the Abbasid caliph of Baghdad, Abu Ja'far Abdullah al-Ma'mun, created the greatest centre of learning the world had ever seen, known as Bayt al-Hikma, the House of Wisdom. The scientists and philosophers he brought together sparked a period of extraordinary discovery, in every field imaginable,

launching a golden age of Arabic science. Few of these scientists, however, are now known in the western world. Abu Rayhan al-Biruni, a polymath who outshines everyone in history except Leonardo da Vinci? The Syrian astronomer Ibn al-Shatir, whose manuscripts would inspire Copernicus's heliocentric model of the solar system? Or the 13th-century Andalucian physician Ibn al-Nafees, who correctly described blood circulation 400 years before William Harvey? Iraqi Ibn al-Haytham who practised the modern scientific method 700 years before Bacon and Descartes, and founded the field of modern optics before Newton? Or even ninth-century zoologist al-Jahith, who developed a theory of natural selection a thousand years before Darwin? The West needs to see the Islamic world through new eyes and the Islamic world, in turn, to take pride in its extraordinarily rich heritage. Anyone who reads this book will understand why.

The Brain That Changes Itself - Norman Doidge 2007-03-15

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will

permanently alter the way we look at our brains, human nature, and human potential.

The Caliph's Splendor - Benson Bobrick 2012-08-14

The Caliph's Splendor is a revelation: a history of a civilization we barely know that had a profound effect on our own culture. While the West declined following the collapse of the Roman Empire, a new Arab civilization arose to the east, reaching an early peak in Baghdad under the caliph Harun al-Rashid. Harun is the legendary caliph of The Thousand and One Nights, but his actual court was nearly as magnificent as the fictional one. In *The Caliph's Splendor*, Benson Bobrick eloquently tells the little-known and remarkable story of Harun's rise to power and his rivalries with the neighboring Byzantines and the new Frankish kingdom under the leadership of Charlemagne. When Harun came to power, Islam stretched from the Atlantic to India. The Islamic empire was the mightiest on earth and the largest ever seen. Although Islam spread largely through war, its cultural achievements were immense. Harun's court at Baghdad outshone the independent Islamic emirate in Spain and all the courts of Europe, for that matter. In Baghdad, great works from Greece and Rome were preserved and studied, and new learning enhanced civilization. Over the following centuries Arab and Persian civilizations made a lasting impact on the West in astronomy, geometry, algebra (an Arabic word), medicine, and chemistry, among other fields of science. The alchemy (another Arabic word) of the Middle Ages originated with the Arabs. From engineering to jewelry to fashion to weaponry, Arab influences would shape life in the West, as they did in the fields of law, music, and literature. But for centuries Arabs and

Byzantines contended fiercely on land and sea. Bobrick tells how Harun defeated attempts by the Byzantines to advance into Asia at his expense. He contemplated an alliance with the much weaker Charlemagne in order to contain the Byzantines, and in time Arabs and Byzantines reached an accommodation that permitted both to prosper. Harun's caliphate would weaken from within as his two sons quarreled and formed factions; eventually Arabs would give way to Turks in the Islamic empire. Empires rise, weaken, and fall, but during its golden age, the caliphate of Baghdad made a permanent contribution to civilization, as Benson Bobrick so splendidly reminds us.

12 Rules for Life - Jordan B. Peterson 2018-01-23

#1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition

with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. *12 Rules for Life* shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

The Prophet - Kahlil Gibran 2021-01-08

The Prophet is a book of 26 prose poetry fables written in English by the Lebanese-American poet and writer Kahlil Gibran. It was originally published in 1923 by Alfred A. Knopf. It is Gibran's best known work. *The Prophet* has been translated into over 100 different languages, making it one of the most translated books in history, and it has never been out of print. The prophet, Al Mustafa, has lived in the city of Orphalese for 12 years and is about to board a ship which will carry him home. He is stopped by a group of people, with whom he discusses topics such as life and the human condition. The book is divided into chapters dealing with love, marriage, children, giving, eating and drinking, work, joy and sorrow, houses, clothes, buying and selling, crime and punishment, laws, freedom, reason and passion, pain, self-knowledge, teaching, friendship, talking, time, good and evil, prayer, pleasure, beauty, religion, and death. Among the most significant works Kahlil Gibran: "Broken Wings", "The Madman", "The Earth Gods" , "The Garden of the Prophet".

1001 Inventions - Salim T. S. Al-Hassani 2012

"Imagine it is the seventh century. As most of Europe continues its descent into a long period of intellectually dormancy, a quiet yet powerful academic revolution is erupting in another corner of the world.

Over the next centuries, the geniuses of Muslim society will thrust the boundaries of knowledge forward to such a degree that their innovations still shape civilizations to this day. The staggering achievements of these men and women influenced the development of modern mathematics, science, engineering, and medicine. *1001 Inventions: The Enduring Legacy of Muslim Civilization* sheds new light on this golden era that was once lost to so many, and celebrates the heritage that we all share"--P. [4] of cover.

Think Again - Adam Grant 2021-02-02

#1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In *Think Again*, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." —Brené Brown, Ph.D., #1 New York Times bestselling author of *Dare to Lead* The bestselling author of *Give and Take* and *Originals* examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the

blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

[Lost Islamic History](#) - Firas Alkhateeb 2017

Islam has been one of the most powerful religious, social and political forces in history. Over the last 1400 years, from origins in Arabia, a succession of Muslim polities and later empires expanded to control territories and peoples that ultimately stretched from southern France to East Africa and South East Asia. Yet many of the contributions of Muslim thinkers, scientists and theologians, not to mention rulers, statesmen and soldiers, have been occluded. This book rescues from oblivion and neglect some of these personalities and institutions while offering the reader a new narrative of this lost Islamic history. The Umayyads, Abbasids, and Ottomans feature in the story, as do Muslim Spain, the savannah kingdoms of West Africa and the Mughal Empire, along with the later European colonization of Muslim lands and the development of modern nation-states in the Muslim world. Throughout, the impact of Islamic belief on scientific advancement, social structures, and cultural development is given due prominence, and the text is complemented by portraits of key personalities, inventions and little known historical nuggets. The history of Islam and of the world's Muslims brings together

diverse peoples, geographies and states, all interwoven into one narrative that begins with Muhammad and continues to this day.

Remembering God - Gai Eaton 2000

[The House of Wisdom](#) - Jonathan Lyons 2011-02-05

For centuries following the fall of Rome, western Europe was a benighted backwater, a world of subsistence farming, minimal literacy, and violent conflict. Meanwhile Arab culture was thriving, dazzling those Europeans fortunate enough to catch even a glimpse of the scientific advances coming from Baghdad, Antioch, or the cities of Persia, Central Asia, and Muslim Spain. There, philosophers, mathematicians, and astronomers were steadily advancing the frontiers of knowledge and revitalizing the works of Plato and Aristotle. In the royal library of Baghdad, known as the House of Wisdom, an army of scholars worked at the behest of the Abbasid caliphs. At a time when the best book collections in Europe held several dozen volumes, the House of Wisdom boasted as many as four hundred thousand. Even while their countrymen waged bloody Crusades against Muslims, a handful of intrepid Christian scholars, thirsty for knowledge, traveled to Arab lands and returned with priceless jewels of science, medicine, and philosophy that laid the foundation for the Renaissance. In this brilliant, evocative book, Lyons shows just how much "Western" culture owes to the glories of medieval Arab civilization, and reveals the untold story of how Europe drank from the well of Muslim learning.

[Brave Girl](#) - Michelle Markel 2013-01-22

An engagingly illustrated account of immigrant Clara Lemlich's pivotal role in the influential 1909 women laborer's strike describes how she worked grueling hours to acquire an education and support her family before organizing a massive walkout to protest the unfair working conditions in New York's garment district. 25,000 first printing.

[Mathematics Education Across Time and Place](#) - Thomas O'Shea 2016-05-25

What is mathematics, and what aspects of it should be taught in schools? How and to whom should it be taught, and how should its understanding

be assessed? These questions continue to drive curriculum development, school organization, teaching methods, and research agendas. No one today doubts that mathematics should be taught in our schools, but this was not always so. *Mathematics Education Across Time and Place* aims to help mathematics teachers, teacher educators, and anyone else interested in mathematics education appreciate the path this discipline has taken through the ages. To understand the historical and social context for schools and the place of mathematics within them, we meet a variety of mathematics educators from different times and places. Though fictional, their lives and social circumstances are based on historical documents and professional sources. They range from ancient Greece to modern Zimbabwe; from Persia to British Columbia; from Islamic Baghdad to revolutionary Paris; from Elizabethan England to twentieth-century New York; and from the rural one-room schools of North America to the modern comprehensive secondary school. By sharing the teachers' lives, we come to understand how they developed their love for teaching mathematics, and how their work fit into the larger social context of their time.

Will - Will Smith 2021-11-09

The instant #1 New York Times bestseller! "It's the best memoir I've ever read." —Oprah Winfrey "Will Smith isn't holding back in his bravely inspiring new memoir . . . An ultimately heartwarming read, Will provides a humane glimpse of the man behind the actor, producer and musician, as he bares all his insecurities and trauma." —USA Today Winner of the NAACP Image Award for Outstanding Literary Achievement One of the most dynamic and globally recognized entertainment forces of our time opens up fully about his life, in a brave and inspiring book that traces his learning curve to a place where outer success, inner happiness, and human connection are aligned. Along the way, Will tells the story in full of one of the most amazing rides through the worlds of music and film that anyone has ever had. Will Smith's transformation from a West Philadelphia kid to one of the biggest rap stars of his era, and then one of the biggest movie stars in Hollywood history, is an epic tale—but it's only half the story. Will Smith thought, with good reason, that he had won at life: not only was his own success unparalleled, his whole family was at the pinnacle of the entertainment world. Only they didn't see it that way: they felt more like star performers in his circus, a seven-days-a-week job they hadn't signed up for. It turned out Will Smith's education wasn't nearly over. This memoir is the product of a profound journey of self-knowledge, a reckoning with all that your will can get you and all that it can leave behind. Written with the help of Mark Manson, author of the multi-million-copy bestseller *The Subtle Art of Not Giving a F*ck*, Will is the story of how one person mastered his own emotions, written in a way that can help everyone else do the same. Few of us will know the pressure of performing on the world's biggest stages for the highest of stakes, but we can all understand that the fuel that works for one stage of our journey might have to be changed if we want to make it all the way home. The combination of genuine wisdom of universal value and a life story that is preposterously entertaining, even astonishing, puts Will the book, like its author, in a category by itself.

Lost History - Michael Hamilton Morgan 2008

A compelling study of the little known contributions of Islam's cultural, artistic, and scientific accomplishments to Western civilization looks not only at the historic achievements of the Muslim world and the role of inspired leaders who encouraged intellectual inquiry, championed tolerance, and sponsored artistic and literary endeavors, but also at the ancient envy that fuels today's conflicts. Reprint.

The Islamic Enlightenment - Christopher de Bellaigue 2017-02-23
SHORTLISTED FOR THE BAILLIE GIFFORD PRIZE 2017 'An eye-opening, well-written and very timely book' Yuval Noah Harari 'The best sort of book for our disordered days: timely, urgent and illuminating' Pankaj Mishra 'It strikes a blow...for common humanity' Sunday Times
The Muslim world has often been accused of a failure to modernise and adapt. Yet in this sweeping narrative and provocative retelling of modern history, Christopher de Bellaigue charts the forgotten story of the Islamic Enlightenment - the social movements, reforms and revolutions that transfigured the Middle East from the early nineteenth century to the present day. Modern ideals and practices were embraced across the region, including the adoption of modern medicine, the emergence of women from purdah and the development of democracy. The Islamic Enlightenment looks behind the sensationalist headlines in order to foster a genuine understanding of Islam and its relationship to the West. It is essential reading for anyone engaged in the state of the world today.

Ancient Libraries - Jason König 2013-04-25
The circulation of books was the motor of classical civilization. But books were both expensive and rare, and so libraries - private and public, royal and civic - played key roles in articulating intellectual life. This collection, written by an international team of scholars, presents a fundamental reassessment of how ancient libraries came into being, how they were organized and how they were used. Drawing on papyrology and archaeology, and on accounts written by those who read and wrote in them, it presents new research on reading cultures, on book collecting and on the origins of monumental library buildings. Many of the traditional stories told about ancient libraries are challenged. Few were really enormous, none were designed as research centres, and occasional

conflagrations do not explain the loss of most ancient texts. But the central place of libraries in Greco-Roman culture emerges more clearly than ever.

The Origins of the Irish - J. P. Mallory 2013-04-01
An essential new history of ancient Ireland and the Irish, written as an engrossing detective story About eighty million people today can trace their descent back to the occupants of Ireland. But where did the occupants of the island themselves come from and what do we even mean by "Irish" in the first place? This is the first major attempt to deal with the core issues of how the Irish came into being. J. P. Mallory emphasizes that the Irish did not have a single origin, but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology, genetics, geology, linguistics, and mythology. Beginning with the collision that fused the two halves of Ireland together, the book traces Ireland's long journey through space and time to become an island. The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper, bronze, and iron brought Ireland into increasingly wider orbits of European culture. Assessments of traditional explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish.

When Christians First Met Muslims - Michael Philip Penn 2015-03-21
The first Christians to meet Muslims were not Latin-speaking Christians from the western Mediterranean or Greek-speaking Christians from Constantinople but rather Christians from northern Mesopotamia who spoke the Aramaic dialect of Syriac. Living in what constitutes modern-day Iran, Iraq, Syria, and eastern Turkey, these Syriac Christians were under Muslim rule from the seventh century to the present. They wrote the earliest and most extensive accounts of Islam and described a complicated set of religious and cultural exchanges not reducible to the solely antagonistic. Through its critical introductions and new translations of this invaluable historical material, When Christians First Met Muslims allows scholars, students, and the general public to explore the earliest interactions of what eventually became the world's two

largest religions, shedding new light on Islamic history and Christian-Muslim relations.

Ibn Al' Arabi - Ibn al-'Arabī 1980

The great 13th century Muslim philosopher explores the mysteries of divine love and wisdom, using the symbolic examples of Biblical figures, prophets and holy men, from Adam to Muhammad.

Rosie's Daughters - Matilda Butler 2007

In *Rosie's Daughters*, Matilda Butler and Kendra Bonnett have written an inspiring collective memoir of the generation of women who excelled at “firsts.” These women, born during World War II, were shaped by and then helped to shape the American historic, economic, political and socio-cultural landscape. They were the pioneers who charted the paths for the Boomer generation. From the vantage point of their sixties, they share their experiences and insights with their own and younger generations. The figurative mother of this generation, Rosie the Riveter, is a mythic figure in our culture, with good reason—she built ships, flew bombers and filled thousands of other essential wartime jobs, upending traditional views of “women's work.” When the war was over, however, American industry thanked Rosie and sent her home. Rosie, who had

known the economic dislocations of The Depression and the employment and service opportunities of the war period, raised her daughters with a mixed message - stay home as wife and mother - be prepared “in case.” Rosie's Daughters grew up and flung wide the doors of employment opportunity that Rosie had unlocked. These women can claim more career “firsts” and greater socio-cultural change than any previous generation. Their stories, recounted in *Rosie's Daughters*, show how the post-war education boom, the sexual revolution and the Pill, civil rights and gender equality, the Vietnam War, NOW and consciousness raising, Roe v. Wade, no-fault divorce and other momentous events influenced their lives and shaped their remarkable journeys. The book is a unique combination of personal stories, research, history, photography and the authors' reflections, engagingly written and beautifully presented. This is social history without the turgid prose, a compilation of interviews without the annoying interruption of flow—even a motivational book without the saccharine—in the appealing voice of perceptive authors. *Rosie's Daughters* will make you laugh and occasionally cry as you read the personal struggles and achievements of this remarkable generation of women who continue to influence our world. Learn from the lessons of their lives as you shape your future.
