Resilience in Ecology and Urban Design - S.T.A. Pickett
2013-01-13

The contributors to this volume propose strategies of urgent and vital importance that aim

to make today's urban environments more resilient. Resilience, the ability of complex systems to adapt to changing conditions, is a key frontier in ecological research and is especially relevant in creative urban design, as urban areas exemplify complex systems. With something approaching half of the world's population now residing in coastal urban zones, many of which are vulnerable both to floods originating inland and rising sea levels, making urban areas more robust in the face of environmental threats must be a policy ambition of the highest priority. The complexity of urban areas results from their spatial heterogeneity, their intertwined material and energy fluxes, and the integration of social and natural processes. All of these features can be altered by intentional planning and design. The complex, integrated suite of urban structures and processes together affect the adaptive resilience of urban systems,

but also presupposes that planners can intervene in positive ways. As examples accumulate of linkage between sustainability and building/landscape design, such as the Shanghai Chemical Industrial Park and Toronto's Lower Don River area, this book unites the ideas, data, and insights of ecologists and related scientists with those of urban designers. It aims to integrate a formerly atomized dialog to help both disciplines promote urban resilience.

Historic London - Stephen Inwood 2012-06-28

There is hardly a city in the world with richer historical and cultural associations than London. It is a place where history has been made for thousands of years, and where it is still being made today. It is not a city frozen in time, preserved in its ancient medieval pomp but a place that

has been at or near the centre of national life for a thousand years and at the forefront of international political, cultural and economic history for each of the past five centuries. Here Stephen Inwood, bestselling author of *A History of London*, and a lifelong student of the city's rich and vibrant history, offers an explorer's guide to London's past. As you walk the streets of the capital, whether you live in the city or are just visiting it, Inwood will show you London's history all around you: stretches of Roman wall; medieval churches and Tudor houses that survived the Great Fire; monastic buildings that survived the Reformation; street markets first established centuries ago that survive today; Georgian streets and squares that were spared the wreckers' ball; Wren churches; Victorian terraces and Inns of Court that survived the Blitz. He takes you to the London of Chaucer and Shakespeare, Samuels Pepys and Johnson; Dickens and Darwin, T.S Eliot and George Orwell. It is the perfect book to have in your

pocket or your bag as you go about your business in this most fascinating of cities.

Gentrification and the Enterprise Culture : Britain 1780-1980 - Prof F. M. L.

Thompson 2001-04-05

The long-running debate on Britain's apparent economic decline in the last 120 years (not exactly noticeable in the living standards of ordinary people, which have risen enormously in that time) has generated a large economic and statistical literature and a great deal of heat in rival social and cultural explanations. The 'decline' has been confidently attributed to the permeation of the business elite by the anti-industrial and anti-commercial attitudes communicated by public schools and the old universities through their propagation of aristocratic and gentry values; and the readiness of the business elite to be thus permeated has been ascribed to the persistent tendency of new men of wealth to transform themselves into landed gentlemen. There have been equally confident claims

to have overturned this traditional view that wealthy merchants and industrialists sought to acquire landed estates and country houses, and to have established that 'gentlemanly values' were in fact economically advantageous to Britain because she never was a primarily industrial economy. In this book, Professor Thompson subjects these interpretations to the test of the actual evidence, and firmly re-establishes the conventional wisdom on the characteristic desire of new money to acquire land and a place in the country, an aspiration which continues to be manifest today. At the same time, he shows that aristocratic and gentry cultures have not by any means been consistently anti-industrial or anti-business, and that many of the businessmen-turned-landowners have in fact not turned their backs on industry, but have founded business dynasties. Gentrification has indeed occurred on a large scale over the last two hundred years, but has had no

discernible effects one way or the other on Britain's economic performance.

The Coveted Westside -

Jennifer Mandel 2022-03-29

From the middle of the nineteenth century, as Euro-Americans moved westward, they carried with them long-held prejudices against people of color. By the time they reached the West Coast, their new settlements included African Americans and recent Asian immigrants, as well as

the indigenous inhabitants and descendants of earlier Spanish and Mexican settlers. The Coveted Westside investigates the settlement and development of Los Angeles in the context of its multiracial, multiethnic population, especially African Americans. Mandel exposes the enduring struggle between Whites determined to create residential heterogeneity and people of color equally determined to obtain full access to the city and its residential opportunities. Not only does this book document the Black homeowners' fight against housing discrimination, it shares personal accounts of Blacks' efforts to settle in the highly desirable Westside of Los Angeles. Mandel explores the White-derived social and legal mechanisms that created this segregated city and the African American-led movement that challenged efforts to block access to fair housing.

Planet Property - Peter Bill 2013-12-01

Planet Property details the inner workings of the UK commercial property, residential development and rental markets. This first major book on the topic for 20 years maps these sectors between 1997 and 2012, during the ten-year boom, the 2008/9 financial crash and its protracted aftermath. Developers and investors made debt-fuelled fortunes during Tony Blair's decade as Prime Minister, during which prices nearly doubled. The 2008 banking crisis led to the sharpest crash in 80 years, under Gordon Brown's tenure, when prices halved. The biggest debt clear-up in history began under David Cameron. Planet Property is the first full guide to the £400 billion sector. The fast-paced book will appeal to insiders as well as outsiders

seeking insight. Students in pursuit of knowledge have dedicated chapters explaining the world of property, its history, inhabitants - and how and why so much money can be made and lost. The book provides a plain-English explanation of how Planet Property spins. Author and journalist Peter Bill explains the roles and relationships between those who fund, develop, own, trade, broker, manage and provide professional and legal advice on offices, shops, industrial property as well as new-build homes. Peter's 11-year editorship of property bible Estates Gazette and his City pages column in the London Evening Standard provided access to leading politicians, bankers, investors, agents and the foremost developers of the era. Many major figures have given interviews for Planet Property. This informed and lively tale is filled with insights and sparkles with anecdotes Peter has gathered during his years of high-level access. The 250-page volume ranges wider

than the out-of-print standard works: Oliver Marriott's *The Property Boom* and Alastair Ross Goobey's *Bricks and Mortals*.

How to pass the APC - Austen Imber 2013-11-05
Graduates undertaking the RICS Assessment of Professional Competence (APC) often find that, in addition to the general information provided by the RICS, guidance is needed on specific areas of their work as general practice surveyors. How to Pass the APC: Essential Advice for General Practice Surveyors has been built around the needs of general practice surveyors, and guides you through the APC process in line with your own competencies - including valuation, marketing, landlord and tenant, estate management, rating, and planning and development work, together with more specialist areas. The author highlights the essentials, showing you how to approach the presentation and interview, providing a bank of examples of real APC questions, together with illustrative responses to demonstrate how the interview process works. Accessible and easy to use, this book gives you comprehensive coverage of the

fundamental elements and is a must read for anyone taking the APC.

Barry Lyndon - William
Makepeace Thackeray
2015-10-14

Barry Lyndon--far from the best known, but by some critics acclaimed as the finest, of Thackeray's works--appeared originally as a serial a few years before VANITY FAIR was written; yet it was not published in book form, and then not by itself, until after the publication of VANITY FAIR, PENDENNIS, ESMOND and THE NEWCOMES had placed its author in the forefront of the literary men of the day. So many years after the event we cannot help wondering why the story was not earlier put in book form; for in its delineation of the character of an adventurer it is as great as VANITY FAIR, while for the local colour of history, if I may put it so, it is no undistinguished precursor of ESMOND. In the number of

FRASER'S MAGAZINE for January 1844 appeared the first instalment of 'THE LUCK OF BARRY LYNDON, ESQ., A ROMANCE OF THE LAST CENTURY, by FitzBoodle,' and the story continued to appear month by month--with the exception of October--up to the end of the year, when the concluding portion was signed 'G. S. FitzBoodle.'

FITZBOODLE'S CONFESSIONS, it should be added, had appeared occasionally in the magazine during the years immediately precedent, so that the pseudonym was familiar to FRASER'S readers. The story was written, according to its author's own words, 'with a great deal of dulness, unwillingness and labour,' and was evidently done as the instalments were required, for in August he wrote 'read for "B. L." all the morning at the club,' and four days later of "'B. L." lying like a nightmare on my mind.' The journey to the East--which was to give us in literary results NOTES OF A JOURNEY FROM CORNHILL TO GRAND

CAIRO--was begun with BARRY LYNDON yet unfinished, for at Malta the author noted on the first three days of November-- 'Wrote Barry but slowly and with great difficulty.' 'Wrote Barry with no more success than yesterday.' 'Finished Barry after great throes late at night.' In the number of Fraser's for the following month, as I have said, the conclusion appeared. A dozen years later, in 1856, the story formed the first part of the third volume of Thackeray's MISCELLANIES, when it was called MEMOIRS OF BARRY LYNDON, ESQ., WRITTEN BY HIMSELF. Since then, it has nearly always been issued with other matter, as though it were not strong enough to stand alone, or as though the importance of a work was mainly to be gauged by the number of pages to be crowded into one cover. The scheme of the present edition fortunately allows fitting honour to be done to the memoirs of the

great adventurer.

The Annual Register -

Edmund Burke 1920

Continuation of the reference work that originated with Robert Dodsley, written and published each year, which records and analyzes the year's major events, developments and trends in Great Britain and throughout the world. From the 1920s volumes of The Annual Register took the essential shape in which they have continued ever since, opening with the history of Britain, then a section on foreign history covering each country or region in turn. Following these are the chronicle of events, brief retrospectives on the year's cultural and economic developments, a short selection of documents, and obituaries of eminent persons who died in the year.
