*Perimeter, Area, and Volume* - David A. Adler 2014-01-24

Grab your jumbo popcorn—you're invited to the premiere of a 3-D movie, all about those three dimensions! Trusted math picture book duo David A. Adler and Ed Miller tackle the differences between two- and three-dimensional objects in their signature bright and kid-friendly way.

Explaining length, width, and height-- and all the different ways we represent those figures-- Adler shows how changing the dimensions of an object affects its size. . . . with some help from a cast of funny, friendly movie monsters. Explaining key vocabulary in simple text and offering numerous concrete examples and sample math problems with included solutions, *Perimeter, Area, and Volume* is a perfect introduction to two- and three-dimensional geometry. The star-studded cast of monsters will help you calculate the perimeter of the set, the area of the movie screen, and the volume of your box of popcorn. Learning about dimensions has never been so entertaining!

[Making Standards Useful in the Classroom](#) - Robert J. Marzano 2008

It's true that state standards often have way too much content and aren't written in a way that enhances classroom instruction and formative assessment. That's why this guide is invaluable for any educator who wants to ensure that standards actually lead to higher student achievement. The authors give you good reasons for why some content standards should be dropped and explain how benchmark statements in standards should be rewritten. Learn how to sequence content and set up grading scales that help facilitate formative assessment and effective instruction. And get clear steps for unpacking and converting standards into guidelines that are much more useful to classroom teachers. To implement this book's much more efficient approach, the authors included over 240 pages of detailed scoring scales and sample measurement topics for k-8 science, math, language arts, social studies, and critical life skills topics for elementary through high school students.

For grades 6-8, our State Standards-based resource meets the measurement concepts addressed by the NCTM standards and encourages the students to review the concepts in unique ways. Each drill sheet contains warm-up and timed drill activities for the student to practice measurement concepts. Students will reinforce and develop their knowledge of measurement tools including: length, volume, time, money, weight and area. Students will be asked to use standard as well as metric units of measure as they practice these measurement skills.

The drill sheets offer space for reflection, and opportunity for the appropriate use of technology. Also contained are assessment and standards rubrics, review sheets, test prep, color activity posters and bonus worksheets. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy, STEM, and NCTM standards.
