The Adventures of Anybody - Richard Bandler 1993

[Flexible Parents, Happy Family](#) - Daniel Illingworth 2010-05-28

The biggest commitment and responsibility that a parent faces, is that of guiding and educating their children, so they can live their lives with integrity and full of happiness. Daily we walk a tightrope trying to keep the balance between instilling in them the values that are important to us, protecting them from "bad experiences," and giving them the necessary freedom to develop their social abilities and widen their horizons. In the age in which we live, it gets harder every day to isolate our children from what we could consider (from our own points of view) as bad influences. Television, the Internet, cellular phones, as well as their groups of social influence at school and in their after school activities expose them to an avalanche of information that we might perceive as harmful, and that we (even though we might want to do it some times), cannot filter for them 24 hours a day. Learning to use Neuro Linguistic Programming with a responsible and experienced instructor and/or through texts like this, expands our own perception of reality and helps us communicate more effectively and directly with our children, helping us this way in expanding the perception of reality that our children have copied from us and exposing them to a world of new and positive experiences that will enrich their lives and will help turn them into happy and successful human beings in the path they choose for their future

[Richard Bandler's Guide to Trance-formation](#) - Richard Bandler 2010-01-01

This wonderful book is for anyone interested in making their life significantly better. It is a goldmine of insights and techniques from one of the greatest geniuses of personal change. As you use the techniques in this book, you will exponentially increase your ability to make dramatic life-enhancing differences. It is by far one of the most entertaining and professionally stimulating books I have read. It will change your life!"-- Paul McKenna, Ph.D, author of I Can Make You Thin and host of The Learning Channel's I Can Make You More than thirty years ago, Richard Bandler set out to discover how some therapists managed to effect startling change with their clients, while others were arguing about theories as their face patients waited in vain for help. Now widely regarded as the world's greatest hypnotist, Richard Bandler observed and developed patterns which became the foundation of neuro-linguistic programming (NLP), arguably one of the most profoundly effective approaches for self-development and change. Since coauthoring the internationally influential books, *The Structure of Magic Volume 1*, and *Patterns of the Hypnotic Techniques of Milton Erickson, M.D. Volume 1*, Bandler has traveled the world, honing his skills and helping people solve problems and achieve goals when other "experts" have been unable to help. Richard

Bandler's Guide to TRANCE-formation, he returns to his roots: hypnotic phenomena, trancework, and altered states to provide a highly compelling prescription for personal change. According to Bandler, "trance" is at the very foundation of human experience. People are not simply in or out of trance, but are moving from one trance to another. They have their work trances, their relationship trances, their driving trances, and their parenting trances. Some of these states are useful and appropriate; others are not. With his signature wit and contrarian approach to therapy, Bandler shows how anyone can reset or reprogram problem behaviors to desired alternatives, with lasting and life-altering results. Peppered with case studies and more than thirty exercises, Richard Bandler's Guide to TRANCE-formation, is an intriguing, engaging, and often amusing, read for anyone, whether they are new to NLP, want to further their NLP training, or simply want to make a positive difference in their own lives.

Coaching by Values (Cbv): - Simon L. Dolan 2011-08-03

This book is about values. It is about life values, work values, family values, and world values. It is also about value alignment. Author Simon Dolan extends the concepts presented in the best-selling *Managing by Values*, adding many innovations including a step-by-step methodology for diagnosing value congruence and tools for conducting real value reengineering (value alignment). Dolan argues that when people understand their values (regardless of how and why they have emerged), and analyze their relative importance and consequences, they can see more clearly how these values affect their daily lives. Extensive research shows that realignment of values ensures better congruence with goals and objectives resulting in deeper inner satisfaction, which positively affects overall well-being, state of mind, performance, and general happiness. This is what the author calls success in the life of business and the business of life. The description is fresh and innovative, the methodology is clear, and the tools can be used by individuals, business professionals, families, organizations, and wellness and life coaches alike. Living with ADHD - Thom Hartmann 2020-05-05

A practical system for those with ADHD to take back their personal power and embrace their unique talents for success in the modern world • Explains how those with ADHD grow up wounded by the negative labels and attitudes surrounding them and their “diagnosis” • Shares simple and fast-acting techniques from neurolinguistic programming (NLP) to recalibrate painful memories into valuable learning experiences, re-pattern learned behaviors and negative habits, and discover personal motivation • Reveals how the novelty-seeking behaviors of those with ADHD are valuable assets to society and should be embraced rather than suppressed One of the first rules of child-rearing is “condemn the behavior, not the child.” Yet this commonsense rule doesn't seem to apply in the case of attention deficit disorder, or ADHD, where the very name of the condition implies that those labeled with it are “disordered,” “deficient,” and incapable of paying attention. Those with ADHD grow up wounded, told by teachers, guidance counselors, even parents that they are dysfunctional and unable to succeed in the “normal” world. But, as ADHD expert Thom Hartmann explains, those with ADHD are capable of great success if they can shift the negative self-image created by others and learn to work with their unique strengths. In this accessible guide for adults with ADHD and the parents and teachers of ADHD children, Hartmann offers a practical system of useful tools and strategies to heal the damage done to a person who grew up labeled as “dysfunctional” and help them cope with--and succeed at--daily life. He explains how the character traits of ADHD were once valuable assets in hunter-gatherer societies and that the later dominance of agricultural and industrial societies, where “farmer” and “worker” skillsets excel, left ADHD “hunters” as behavioral outcasts. Sharing simple and often fast-acting techniques from neurolinguistic programming (NLP), Hartmann explains how those with ADHD can take back their personal power, recalibrate painful memories into valuable learning experiences, shed fears and negative habits, and rebuild their self-image in a positive way. By integrating the strategies in this book into daily life, those with ADHD can transform their way of responding to the world, discover personal motivation, and teach their children to do the same. As Hartmann reveals, it is not ADHD that needs to be healed but our attitudes toward those born with the “hunter” gift.
