Reading Ethics - Miranda Fricker 2009

This introductory text encourages students to engage with key problems and arguments in ethics through a series of classic and contemporary readings. It will inspire students to think about the distinctive nature of moral philosophy, and to draw comparisons between different traditions of thought, between ancient and modern philosophies, and between theoretical and literary writing about the place of value in human life. Each of the book's six chapters focuses on a particular theme: the nature of goodness, subjectivity and objectivity in ethical thinking, justice and virtue, moral motivation, the place of moral obligation, and the idea that literature can be a form of moral philosophy. The historical readings come from Plato, Aristotle, Hume, Kant and Mill; and the contemporary readings from Foot, Rawls, McDowell, Mackie, Nagel, Williams, Nussbaum and Gaita. The editors' introductions to the themes, and the interactive commentaries they provide for each reading, are intended to make Reading Ethics come as close as possible to a seminar in philosophy.

The Differentiated Classroom - Carol Ann Tomlinson 2014-05-25

Although much has changed in schools in recent years, the power of differentiated instruction remains the same—and the need for it has only increased. Today's classroom is more diverse, more inclusive, and more plugged into technology than ever before. And it's led by teachers under enormous pressure to help decidedly unstandardized students meet an expanding set of rigorous, standardized learning targets. In this updated second edition of her best-selling classic work, Carol Ann Tomlinson offers these teachers a powerful and practical way to meet a challenge that is both very modern and completely timeless: how to divide their time, resources, and efforts to effectively instruct so many students of various backgrounds, readiness and skill levels, and interests. With a perspective informed by advances in research and deepened by more than 15 years of implementation feedback in all types of schools, Tomlinson explains the theoretical basis of differentiated instruction, explores the variables of curriculum and learning environment, shares dozens of instructional strategies, and then goes inside elementary and secondary classrooms in nearly all subject areas to illustrate how real teachers are applying differentiation principles and strategies to respond to the needs of all learners. This book's insightful guidance on what to differentiate, how to differentiate, and why lays the groundwork for bringing differentiated instruction into your own classroom or refining the work you already do to help each of your wonderfully unique learners move toward greater knowledge, more advanced skills, and expanded understanding. Today more than ever, *The Differentiated Classroom* is a must-have staple for every teacher's shelf and every school's professional development collection.

The Rise of Rome - Anthony Everitt 2013-11-12

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE KANSAS CITY STAR From Anthony Everitt, the bestselling author of acclaimed biographies of Cicero, Augustus, and Hadrian, comes a riveting, magisterial account of Rome and its remarkable ascent from an obscure agrarian backwater to the greatest empire the world has ever known. Emerging as a market town from a cluster of hill villages in the eighth and seventh centuries B.C., Rome grew to become the ancient world's preeminent power. Everitt fashions the story of Rome's rise to glory into an erudite page-turner filled with lasting lessons for our time. He chronicles the clash between patricians and plebeians that defined the politics of the Republic. He shows how Rome's shrewd strategy of offering citizenship to her defeated subjects was instrumental in expanding the reach of her burgeoning empire. And he outlines the corrosion of constitutional norms that accompanied Rome's imperial expansion, as old habits of political compromise gave way, leading to violence and civil war. In the end, unimaginable wealth and power corrupted the traditional virtues of the Republic, and Rome was left triumphant everywhere except within its own borders. Everitt paints indelible portraits of the great Romans—and non-Romans—who left their mark on the world out of which the mighty empire grew: Cincinnatus, Rome's George Washington, the very model of the patrician warrior/aristocrat; the brilliant general Scipio Africanus, who turned back a challenge from the Carthaginian legend Hannibal; and Alexander the Great, the invincible Macedonian conqueror who became a role model for generations of would-be Roman rulers. Here also are the intellectual and philosophical leaders whose observations on the art of government and "the good life" have inspired every Western power from antiquity to the present: Cato the Elder, the famously incorruptible statesman who spoke out against the decadence of his times, and Cicero, the consummate orator whose championing of republican institutions put him on a collision course with Julius Caesar and whose writings on justice and liberty continue to inform our political discourse today. Rome's decline and fall have long fascinated historians, but the story of how the empire was won is every bit as compelling. With *The Rise of Rome*, one of our most revered chroniclers of the ancient world tells that tale in a way that will galvanize, inform, and enlighten modern readers. Praise for *The Rise of Rome* "Fascinating history and a great read."—Chicago Sun-Times "An engrossing history of a relentlessly pugnacious city's 500-year rise to empire."—Kirkus Reviews "Rome's history abounds with remarkable figures. . . . Everitt writes for the informed and the uninformed general reader alike, in a brisk, conversational style, with a modern attitude of skepticism and realism."—The Dallas Morning News "[A] lively and readable account . . . Roman history has an uncanny ability to resonate with contemporary events."—Maclean's "Elegant, swift and faultless as an introduction to his subject."—The Spectator "[An] engaging work that will captivate and inform from beginning to end."—Booklist
