The Origin of Competitive Strength - Akira Kawahara 2012-12-06

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

An Introduction to Virtual Sound Barriers - Xiaojun Qiu 2019-07-09

A virtual sound barrier is an active noise control system that uses arrays of loudspeakers and microphones to create a useful size of quiet zone and can be used to reduce sound propagation, radiation, or transmission from noise sources or to reduce noise level around people in a noisy environment. This book introduces the history, principle, and design methods of virtual sound barriers first, and then describes recent progress in research on the systems. Two virtual sound barrier systems, i.e., planar virtual sound barrier system and three-dimensional virtual sound barrier system, are discussed including applications, limitations and future direction discussions.

Internal Combustion Engines - Institution of Mechanical Engineers 2014-10-10

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty

Rethinking 'Classical Yoga' and Buddhism - Karen O'Brien-Kop 2021-09-09

This book revisits the early systemic formation of meditation practices called 'yoga' in South Asia by employing metaphor theory. Karen O'Brien-Kop also develops an alternative way of analysing the reception history of yoga that aims to decentre the Eurocentric and imperialist enterprises of the nineteenth-century to reframe the cultural period of the 1st - 5th centuries CE using categorical markers from South Asian intellectual history. Buddhist traditions were just as concerned as Hindu traditions with meditative disciplines of yoga. By exploring the intertextuality of the Patanjalyogasastra with texts such as Vasubandhu's *Abhidharmakosabhasya* and Asanga's *Yogacarabhumisastra*, this book highlights and clarifies many ideologically Buddhist concepts and practices in Patanjala yoga. Karen O'Brien-Kop demonstrates that 'classical yoga' was co-constructed systemically by both Hindu and Buddhist thinkers who were drawing on the same conceptual metaphors of the period. This analysis demystifies early yoga-meditation as a timeless 'classical' practice and locates it in a specific material context of agrarian and urban economies.

Resurrecting Bertha - Rob Siegel 2019-09-15

To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they

ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. *Resurrecting Bertha* is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.

Vehicle-dependent Expedition Guide - Tom Sheppard 2008

Kingdom of Twilight - Steven Uhly 2018-08-07

"POWERFUL AND ORIGINAL." --THE TIMES "REWARDING AND WHOLLY ENGAGING." --HISTORICAL NOVEL SOCIETY "ONE OF THE MOST IMPORTANT AND POWERFUL NOVELS OF RECENT GERMAN LITERATURE." --DEUTSCHLANDRADIO KULTUR Hypnotically lyrical and intensely moving, Steven Uhly's epic novel set in the wake of World War II is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. *Kingdom of Twilight* follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they

try to make sense of a changed world, and of their place in it.
