*The Lost Ship of Noah* - Charles Berlitz 1987

*Noah in Ancient Greek Art* - Robert Bowie Johnson, Jr. 2007-12-01

If you've read "The Parthenon Code: Mankind's History in Marble" by Mr. Johnson, you're in for a further treat. "Noah in Ancient Greek Art" goes deeper into the true identity of Athena, identifying the real woman she represents—the one who came through the Flood on the ark as Ham's wife. It sounds fantastic, but just wait and see. The evidence is overwhelming. In the early post-Flood world, this woman was so influential in promoting the resurgence of the way of Kain (Cain) that every Mediterranean and Mid-eastern culture idolized her, often using different names for different aspects and

achievements of this "goddess." If you haven't yet read "The Parthenon Code," you're in for a big surprise in this book. What today's scholars call ancient myth is not myth at all, but rather the history of the human race expressed from the standpoint of the way of Kain. This new book is written in such a way that you will be able to pick up and understand this crucial thread very quickly. In most cases, the ancient art speaks for itself. The Greek gods look exactly like people because, with rare exceptions, that is who they represent. In Plato's Dialogue, "Euthydemus," Socrates referred to Zeus, Apollo and Athena as his "lords and ancestors." Another witness to this obvious truth is the life of the great hero, Herakles. À la "George Washington slept here," scores of Greek towns claimed that Herakles had performed some kind of great feat (often one of his twelve labors) within or near their boundaries. Herakles was a real man. In fact, he was the Nimrod of

Genesis. On a vase-painting in the book, Athena picks up the hero Herakles in her chariot at his death, and takes him to immortality on Mount Olympus. Who does he join there, space aliens? Of course not. He joins his ancestors, the Olympian family. If it looks like a human, talks like a human, and acts like a human, it must be a human. This is the key to understanding Greek art. The Greeks claimed their descent from an original brother-sister/husband-wife pair named Zeus and Hera. Zeus and Hera are the Greek versions of Adam and Eve. The Greeks referred to Zeus as the father of gods (ancestors) and men, and to Hera as the mother of all living. Their poets and playwrights traced this first couple to an ancient paradise called the Garden of the Hesperides, and always depicted it with a serpent-entwined apple tree. You have probably heard at one time or another about Eve eating the apple. The Hebrew word for fruit in Chapter 3 of Genesis is a general term. The idea that

Adam and Eve took a bite of an apple comes to us from the Greek tradition. The author gives you this, and all the other background you need to understand Noah's place in ancient Greek art. As the narrative progresses, you'll see that Noah was not some vague figure remembered by a few maverick Greek artists. Greek vase-artists and sculptors actually defined the rapid growth and development of their contrary religious outlook in direct relation to Noah and his loss of authority. Greek artists portrayed the victory of their man-centered idolatrous religion as the simultaneous defeat of Noah and his Yahweh-believing children. The twelve labors of Herakles sculpted on the temple of Zeus at Olympia (restored and explained in Section III of the book), in and of themselves, chronicled and celebrated mankind's successful rebellion against Noah and his God after the Flood. The most important part of this book may be Section IV which explains why the scholarly world remains blind

to the obvious and simple historical truths expressed in ancient art. The short answer is that Darwinism (what the author calls Slime-Snake-Monkeyism) has thoroughly polluted the mainstream sciences. Today, mainstream anthropologists do not study the record of our origins that our ancient ancestors have left us in their art and literature. Instead, they study chimpanzees. This is very sad, pitiful even. These grown men and women work diligently and proudly in an effort to find the evidence that will finally "prove" that they themselves, along with their vaunted intellects, are the products of unintelligent chance, with no expectation of immortality. The author continues to marvel along with the apostle Paul, as perhaps you will as well: "Does not God make stupid the wisdom of this world?" (I Corinthians 1:20). "Noah in Ancient Greek Art" features 140 illustrations including twenty-seven vase-scenes of Noah, most in an historical context. This book is the best

evidence against Slime-Snake-Monkeyism you'll ever read.

Rick Antonson 2016-04-12  
Acclaimed travel writer Rick Antonson sets his adventurous compass on Mount Ararat, exploring the region's long history, religious mysteries, and complex politics. Mount Ararat is the most fabled mountain in the world. For millennia this massif in eastern Turkey has been rumored as the resting place of Noah's Ark following the Great Flood. But it also plays a significant role in the longstanding conflict between Turkey and Armenia. Author Rick Antonson joined a five-member expedition to the mountain's nearly 17,000-foot summit, trekking alongside a contingent of Armenians, for whom Mount Ararat is the

stolen symbol of their country. Antonson weaves vivid historical anecdote with unexpected travel vignettes, whether tracing earlier mountaineering attempts on the peak, recounting the genocide of Armenians and its unresolved debate, or depicting the Kurds' ambitions for their own nation's borders, which some say should include Mount Ararat. What unfolds in *Full Moon Over Noah's Ark* is one man's odyssey, a tale told through many stories. Starting with the flooding of the Black Sea in 5600 BCE, through to the Epic of Gilgamesh and the contrasting narratives of the Great Flood known to followers of the Judaic, Christian and Islamic religions, *Full Moon Over Noah's Ark* takes readers along with Antonson through the shadows and broad landscapes of Turkey, Iraq, Iran and Armenia, shedding light on a troubled but fascinating area of the world.

In 1985, researchers found Titanic resting on the ocean floor, and the international buzz continues. Now, is there evidence that the worlds other famous ship is perched on the snowy slopes of turkey's Mt. Ararat? Is Noah's ark myth or reality? Veteran explorer Richard Bright has spent two decades investigating the claims for the wooden vessel mentioned in the Bible. Over a dozen expeditions to the site and countless hours in research make Bright an authority on the ship Genesis says preserved the life of eight humans and a cargo of animals during a global cataclysm. This incredible book details the dramatic climbs, political intrigue, and sheer danger involved in a quest for the greatest archaeological treasure of all time. Never-before-seen photographs, expedition accounts, and persuasive evidences point to a

*Echoes of Ararat* - Nick Liguori 2021-01-29

In *Echoes of Ararat*, author Nick Liguori contends that oral traditions of the Flood - and the

survival of the few inside the floating Ark - are even more prevalent than previously thought, and they powerfully confirm the truth of the Genesis account. This unprecedented work carefully documents hundreds of native traditions of the Flood - as well as the Tower of Babel and the Garden of Eden - from the tribes of North and South America. Learn what the Cherokee, Lakota, Iroquois, Cheyenne, Inuit, Inca, Aztec, Guarani, and countless other tribes claimed about the early history of the world. Liguori also shares many evidences for the historical reliability of Genesis, and shows that the Genesis Flood account is not dependent on the Epic of Gilgamesh or other Near-Eastern texts, as skeptics claim. Rather, its author Moses had access to ancient records passed down by the early Patriarchs, including Joseph, Jacob, Abraham, and even Noah himself.

*The Unsolved Mystery of Noah's Ark* - Mary Irwin 2012-10

Ararat, a behemoth of a mountain, is 17,000 feet of pain for anyone who dares trespass upon its icy heights. It is a place of dread where one wrong step can send climbers careening down a steep, glacial field into the abyss known as the Ahora Gorge. Many have died on those slopes, and some have never been seen again. So why do climbers come to this place on the far east of the Turkish Frontier? It is not for sport alone; in fact, for most, that is far from the real reason. They come to Ararat flirting with death to find an old boat we all know as Noah's ark. It is said that its rotting corpse is somewhere up there in the swirling clouds and slumbering silence of ancient ice. Come with Mary Irwin, one of the original "ark-aeologists," as she travels to Ararat and back again uncovering many of the ancient secrets of Noah's ark. You may be surprised what you find!

[The Ark Discoveries](#) - Richard Carl Bright 2021-12-06

The Bible and Hebrew texts tell us: The Bible tells us in Genesis 8:4 that the ark rested "upon the mountains of Ararat."

Hebrew text tells us the ark came to rest on the mountains of "rrt." There are no vowels in original Hebrew text, so "rrt" translated to Urartu and later to Ararat. Research tells us the area extended from southeastern Turkey across the present border into Iran and north to include most of present day Armenia to the southwest corner of Georgia then southwest to about the present city of Malatya and back southeast and south of Lake Van and southeast Turkey. It covered much of the eastern 1/3 of the present day Turkey. Mount Ararat is within that general area. Additional research that includes the time when Genesis is understood to have been written by Moses

(1400-1450 BC) indicates that the Urartu Kingdom may have included the area into what is now Northern Iraq and to Historic Assyria. Additional research using Wikipedia tell us Assyrian sources from early 1300 BC have the Urartu Kingdom in the vast mountainous regions southwest of the Black Sea and Southwest of the Caspian Sea. Mount Ararat is within that general area. If the "mountains of Ararat," or Urartu has included such a large area or areas over the centuries, then since there has been no verifiable discovery that has been proven to be a large structure of a great age, It can be understood why some researchers are of the opinion that Mount Ararat may not have been in the area of Urartu at the time of the writing of the book of Genesis, or the ark did not land on Mount Ararat, but on another mountain within the vast area. Some other mountains suggested by those who have varied opinions are mentioned in chapter 17. There is also the belief by some that Mount

Ararat is a post-flood mountain. This rationale is pursued despite the many reports (more than 40) of an ark sighting on Mount Ararat. A question here given regarding the landing place of the ark may be: Was Mount Ararat in the Urartu Kingdom at the time Genesis was written? (You have read this book; you know my position on the position of Mount Ararat when the ark landed and when Genesis was written). It certainly was in the Urartu Kingdom in the 9th century BC which later succeeded to the Armenians in the 6th century BC, but was Mount Ararat included in the "mountains of Ararat" (Gen. 8:4) when the book of Genesis was written? Moses is understood to have written the book of Genesis. Henrietta C. Mears (chapter 9, foot note 13) says the book of Genesis closes about 300 years before Moses was born. Moses could have only received the information to write the book by a direct revelation from God, or by historical records. If historical records were involved, where

did the records come from? She writes: "No doubt it was written long before by Abraham, Noah, or Enoch, who knows?" Dr. Henry Morris agrees (also chapter 9, footnote 14) and adds that oral traditions handed down over the centuries may have been involved here too. God shared the records with Moses in whatever manner he chose to do so. The Word of God is truth. As far as Mt. Ararat being a post-flood mountain as some seem to believe, Dr. John Morris, Dr. Tim LaHaye and other scientists tell us the mountain was pre-flood and grew to its greatest height with all the geological activity that took place during the flood (Chapter 9). Turkish geologist Dr. Bayraktutan has located what are believed to be "basement rocks" that give proof that Mount Ararat was pre-flood ("Who We Are" section). A question may be: What area did the Urartu Kingdom occupy long before Moses arrived on the scene? Wherever the area was I am of the belief that Mount Ararat

was included in that area that would be known as the "mountains of Ararat" at the time the ark landed on it. I have personally talked with at least 6 people who have seen, or have personal knowledge of the ark on Ararat. They are the Reverend Vince Will who saw it from an aircraft in WWII, Ed Davis who during WWII was taken to see the ark by Kurds from his base in neighboring Iran, two 2 Kurdish shepherds who told me they saw part of a large structure, Dudley Thomas who held a top secret security clearance and saw satellite photographs and classified information in the "Science and technology Highlights" classified journal when in the navy, and Saim Sahin who was taken to the ark and was able to touch it. Their stories are in chapters 5 and 17, as well as in "Who We Are" and the "Sketches and Photo Sections." A complete study of the Urartu Kingdom can be seen here: [https://www.noahsarksearch.com/Urartu\\_Ararat\\_Boundaries.pdf](https://www.noahsarksearch.com/Urartu_Ararat_Boundaries.pdf)

View from the Ark - Dr. Diana Prince 2015-03-12

About the Book View from the Ark is a groundbreaking book documenting the work of American researcher, David Fasold, and what is today believed to be the authentic site of Noah's Ark. Fasold's extensive scientific work was the basis for the Turkish government's official and only declaration that Noah's Ark has been found. The site lies in the mountains of Ararat, near the Turkish village of Dogubayazit. This area is now designated as a national park, and the ark site designated in the Turkish as "Nuhun Gemisi" is now a

national treasure. Fasold was formerly with the United States Merchant Marines and had traveled the world. He later spent years operating a successful salvaging business in Florida exploring sunken ships and aircraft and was a close friend of the legendary Mel Fisher. Fasold brought his comprehensive nautical skills and understanding of fluid dynamics together with his knowledge of ancient cultures. He then used new technology to answer old questions. He used a molecular frequency generator, and later, ground-penetrating radar, a technology formerly used in projects by NASA. But it was his keen ability to put the pieces together into a coherent whole that brought his work to the attention of the world. Recognized by Turkey's High Commission for Noah's Ark, and under the direction of Dr. Salye Baraktutan of Ataturk University in Erzerum, Turkey, Fasold was the only non-Turkish person ever allowed to sit as a member of the commission.

Noah's Ark has been found! Turkish scientists and authorities at the highest level of government met in 1986 and reviewed the extensive research done by American explorers, headed by Ron Wyatt of Madison, Tennessee. They agreed it was an ancient, manmade ship and could be nothing other than Noah's Ark. In 1987 they officially dedicated "Noah's Ark" as a national treasure and began work on a Visitor's Center overlooking the site. Since 1988, when the center was completed, visitors from all over the world have come to view the amazing discovery. This book gives a brief, concise description of Ron Wyatt's research. It explains the analysis of the specimens which show this site to contain sophisticated manmade metal alloys. It shows the electronic scans which reveal the pattern of a massive ship. And much

more evidence which clearly points to the identification of this site as containing the remains of Noah's Ark.

Archeologist and historian Dr. Ian James receives a fervent call from an old friend. His presence is requested immediately in Egypt to help verify evidence of an ancient, even sacred, artifact. A far cry from his typical work as a professor, he suddenly finds himself plunged into a battle of worldviews, at war to define how we view history. What if archeologists found something that could change the world forever? What if the world came face-to-face with an artifact so ancient and so controversial that some would go to any length "even murder" to hide it? With the help of fellow archeologists, the support of a wealthy, God-fearing senator and an

insatiable interest in finding the truth, Dr. James is on a quest to uncover one of the most important archeological finds in all of history. But things are not always what they appear, and supposed safety can quickly turn into a fight for their life. An inner-circle of ACLU members will attempt to thwart Dr. James at every turn. Some will stop at nothing a "even murder" to make sure that Noah's Ark will never be recovered. In "The Search for Noah's Ark," see the battle for truth unfold, as men of wealth and power collide to either reveal the truth they've always hoped existed, or to destroy it forever."

In the summer of 1943, while a U. S. Army sergeant stationed in Hamadan, Iran, Ed Davis became friends with some local Kurd tribesman (or Lourd, in Davis's original account), who told him of Noah's ark on Mount Ararat. The ark and items from it were considered holy relics, generally kept from outsiders, but the patriarch's

friendship with Davis made him an exception. They showed him items from the ark, including a cage door, latches, and shepherd staffs. All the wooden items were described as petrified. Tribal leader Abas-Abas and seven of his sons led Davis up the northeast side of Ararat, but bad weather prevented getting closer than half a mile to the ark. But Davis did see it; it was broken into three or four pieces, of which Davis saw two; the nearer had at least three floors. Abas-Abas supplied other details. The living space for people is at the top; the ark's door was hinged at the top; construction was done with wooden pegs. Dr. Don Shockey received his B.A. in anthropology from the university of New Mexico and his O.D. from Pacific University College of Optometry, Forest Grove, Oregon. Dr. Shockey taught science in the public schools at Taos, New Mexico, and was an anthropology instructor at the Taos branch of the University of New Mexico. He is co-founder and co-owner of the Governor Bent Museum

in Taos, and founder and president of the Foundation for International Biblical Exploration and Research (F.I.B.E.R.) in Albuquerque, New Mexico. Dr. Shockey has lectured widely throughout the western states and has made

many television appearances. He was a member of the 1984 expedition on Mount Ararat searching for evidence of the Ark of Noah. The expedition was filmed by Turkish National Television.
