The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education - Helga R. Gudmundsdottir 2020-05-19

The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education examines the many methods and motivations for vocal pedagogy, promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of communication with social, psychological, and didactic functions. Presenting research from myriad fields of study beyond music—including psychology, education, sociology, computer science, linguistics, physiology, and neuroscience—the contributors address singing in three parts: Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume II: Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer, wishes to become a singer, works with singers, or is interested in the application of singing for the purposes of education.

The Garland Handbook of African Music - Ruth M. Stone 2010-04-02

The Garland Handbook of African Music is comprised of essays from The Garland Encyclopedia of World Music: Volume 1, Africa, (1997). Revised and updated, the essays offer detailed, regional studies of the different musical cultures of Africa and examine the ways in which music helps to define the identity of this particular area. Part One provides an in-depth introduction to Africa. Part Two focuses on issues and processes, such as notation and oral tradition, dance in communal life, and intellectual property. Part Three focuses on the different regions, countries, and cultures of Africa with selected regional case studies. The second edition has been expanded to include exciting new scholarship that has been conducted since the first edition was published. Questions for Critical Thinking at the end of each major section guide and focus attention on what musical and cultural issues arise when one studies the music of Africa -- issues that might not occur in the study of other musics of the world. An accompanying audio compact disc offers musical examples of some of the music of Africa.

across all regions.

Music and Identity - Eric Ayisi Akrofi 2006-06-01

"Due to significant political and social changes over the last decade in their countries and worldwide, many scholars in the Nordic nations and in Southern Africa have been researching on 'music and identity' - an area with a paucity of literature. It is our hope that this book will be beneficial to scholars interested in the field of music and identity. This volume is the result of the Swedish South African Research Network (SSARN) project, funded from 2004-2006 by the Swedish International Development Cooperation Agency (SIDA) and the National Research Foundation (NRF) of South Africa, under the theme 'Music and Identity'. SSARN was founded by Stig-Magnus Thorsén of the University of Gothenburg, Sweden, in 2002 when he invited Nordic and Southern African scholars to participate in a research group focusing broadly on the topic 'Music and Identity'"--Publisher's website.

Grazing and Growing - Megan Meyers 2018-02-27

This book explores the impact of contextualized worship arts on the development of church ministry and missions in urban churches in Beira, Mozambique. This applied research, which took place over the course of two years, focuses on expanding the song-writing workshop model in an effort to enhance culturally appropriate worship in the local church. Results of this study include increased use of local hymnody, intentional use of worship to teach theological truths, engaged pastors and empowered worship leaders, and a greater missional involvement through the use of contextualized worship arts. This book clearly demonstrates the necessity of contextualized worship arts as a key component of local church growth and the development of its members, encouraging personal discipleship, growing local ministry, and empowering for mission.

Materiality and Visuality in North East India - Tiplut Nongbri 2021-07-16

This edited book set in the context of North East India explores issues concerning symbols, meanings, representations, and social implications of materiality and visuality, as well as the dynamics of power, social reproduction, ideological dominance and knowledge production, from an interdisciplinary perspective. It seeks to answer the question of why some things matter more than others or what happens when certain things are made more visible than others. The book provides valuable insights into the process of identity construction through the use of cultural sources, both material and visual. Following on the debates/discussions on material and visual culture in the 1970s and 1980s, the book argues that instead of viewing objects as mere representation(s), one should see them as active agents in creating perceptions, bodily practices, discourses and perceptions of our social world. Each chapter in the book unravels and engages with these pertinent issues in order to arrive at a more comprehensive understanding of the status quo. The book is of interest to scholars of ethnicity, identity construction, politics and state, cultural studies, media studies, visual, social and cultural anthropology and sociology, as well as lay readers who want to learn more about the region.

Postcolonial Readings of Music in World Literature - Cameron Fae Bushnell 2013

This book reads representations of Western music in literary texts to reveal the ways in which artifacts of imperial culture function within contemporary world literature. Bushnell argues that Western music's conventions for performance, composition, and listening, established during the colonial period, persist in postcolonial thought and practice. Music from the Baroque, Classical, and Romantic periods (Bach through Brahms) coincides with the rise of colonialism, and Western music contains imperial attitudes and values embedded within its conventions, standards, and rules. The book focuses on the culture of classical music as reflected in the worlds of characters and texts and contends that its effects outlast the historical significance of the real composers, pieces, styles, and forms. Through examples by authors such as McEwan, Vikram Seth, Bernard MacLaverty, Chang-rae Lee, and J.M. Coetzee, the book demonstrates how Western music enters narrative as both acts of history and as structures of analogy that suggest subject positions, human relations, and political activity that, in turn, describes a postcolonial condition. The uses to which Western music is put in each literary text reveals how European art music of the seventeenth through the nineteenth centuries is read and misread by postcolonial generations, exposing mostly hidden cultural structures that influence our contemporary understandings of social relations and hierarchies, norms for resolution and for assigning significance, and standards of propriety. The book presents strategies for thinking anew about the persistence of cultural imperialism, reading Western music simultaneously as representative of imperial, cultural dominance and as suggestive of resistant structures, forms, and practices that challenge the imperial hegemony.

Culturally Sustaining Pedagogies in Music Education - Emily Good-Perkins 2021-09-30

This volume problematizes the historic dominance of Western classical music education and posits culturally sustaining pedagogy (CSP) as a framework through which music curricula can better serve increasingly diverse student populations. By detailing a qualitative study conducted in an urban high school in the United States, the volume illustrates how traditional approaches to music education can inhibit student engagement and learning. Moving beyond culturally responsive teaching, the volume goes on to demonstrate how enhancing teachers' understanding of alternative musical epistemologies can support them in embracing CSP in the music classroom. This new theoretical and pedagogical framework reconceptualizes current practices to better sustain the musical cultures of the minoritized. This text will benefit researchers, academics, and educators with an interest in music education, multicultural education, and urban education more broadly. Those specifically interested in ethnomusicology and classroom practice will also benefit from this book.

[Music in the British Provinces, 1690-1914](#) - Peter Holman 2017-07-05

The period covered by this volume, roughly from Purcell to Elgar, has traditionally been seen as a dark age in British musical history. Much has been done recently to revise this view, though research still tends to focus on London as the commercial and cultural hub of the British Isles. It is becoming increasingly clear, however, that by the mid-eighteenth century musical activity outside London was highly distinctive in terms of its reach, the way it was organized, and its size, richness, and quality. There was an extraordinary amount of musical activity of all sorts, in provincial theatres and halls, in the amateur orchestras and choirs that developed in most towns of any size, in taverns, and convivial clubs, in parish churches and dissenting chapels, and, of course, in the home. This is the first book to concentrate specifically on musical life in the provinces, bringing together new archival research and offering a fresh perspective on British music of the period. The essays brought together here testify to the vital role played by music in provincial culture, not only in socializing and networking, but in regional economies and rivalries, demographics and class dynamics, religion and identity,

education and recreation, and community and the formation of tradition. Most important, perhaps, as our focus shifts from London to the regions, new light is shed on neglected figures and forgotten repertoires, all of them worthy of reconsideration.

Music and Theology in Nineteenth-Century Britain - Martin Clarke
2016-04-22

The interrelationship of music and theology is a burgeoning area of scholarship in which conceptual issues have been explored by musicologists and theologians including Jeremy Begbie, Quentin Faulkner and Jon Michael Spencer. Their important work has opened up opportunities for focussed, critical studies of the ways in which music and theology can be seen to interact in specific repertoires, genres, and institutions as well as the work of particular composers, religious leaders and scholars. This collection of essays explores such areas in relation to the religious, musical and social history of nineteenth-century Britain. The book does not simply present a history of sacred music of the period, but examines the role of music in the diverse religious life of a century that encompassed the Oxford Movement, Catholic Emancipation, religious revivals involving many different denominations, the production of several landmark hymnals and greater legal recognition for religions other than Christianity. The book therefore provides a valuable guide to the music of this complex historical period.

Popular Music, Cultural Politics and Music Education in China - Wai-Chung Ho 2016-12-08

While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the

development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation, which feared 'spiritual pollution' by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and students, the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland.

The Ethnomusicology of Western Art Music - Laudan Nooshin
2015-09-22

Since the late 1980s, the boundaries between the 'musicologies' have become increasingly blurred. Most notably, a growing number of musicologists have become interested in the ideas and methodologies of ethnomusicology, and in particular, in applying one of the central methodological tools of ethnomusicology - ethnography - to the study of Western 'art' music, a tradition which had previously been studied primarily through scores, recordings and other historical sources. Alongside this, since the 1970s a small number of ethnomusicologists have also written about Western art music, thus complicating the idea of ethnomusicology as the study of 'other' music. Indeed, there has been a

growth in this area of scholarship in recent years. Approaching western art music through the perspectives of ethnomusicology can offer new and enriching insights to the study of this musical tradition, as shown in the writings presented in this book. The current volume is the first collection of essays on this topic and includes work by authors from a range of musicological and ethnomusicological backgrounds, exploring a variety

of issues including music in orchestral outreach programmes, new audiences for classical music concerts, music and conflict transformation, ethnographic study of the rehearsal process, and the politics of a high-profile music festival. This book was originally published as a special issue of *Ethnomusicology Forum*.
