Fairness in International Climate Change Law and Policy - Friedrich Soltau

2009-09-14

This work analyses fairness dimensions of the climate regime. A central issue in international law and policy is how countries of the world should allocate the burden of addressing global climate change. With the link between human activities and climate change clearly established, and the first impacts of climate change being felt, there is a renewed sense of urgency in addressing the problem. On the basis of an overview of science and the development of the climate regime, this book seeks to identify the elements of a working consensus on fairness principles that could be used to solve the seemingly intractable problem of assigning responsibility for combating climate change. The book demonstrates how an analysis of fairness dimensions of climate change - grounded in practical developments and

illustrated with reference to the key issues - can add value to our understanding of the options for international climate law and policy.

All the systems and processes highlighted in the book have been practically implemented and are based on real life experiences of laying down strategies and execution of processes implemented.

Endorsement The not for profit world is a large and growing segment of economic activity globally. As economies grow and wealth accumulates, the urge to make a lasting, intergenerational contribution to human welfare is a deep part of our nature. Many enter this new world without a firm

grasp of the financial structures that underpin the not for profit world. Into this gaps steps Biswajeet Chatterjee, with his new book Best Practices for a Global Not for Profit Organization. The book describes in clear and simple terms the fundamental accounting principles and regulatory requirements of the not for profit world. Best Practices for a Global Not for Profit Organization offers, in one place, in clear a simple language, a badly needed guide for all those new and established in this world. Not only does the book provide an outline of what is needed financially, it also provides a clear description how to navigate through the regulatory requirements that are often much different from those of the for profit world. Biswajeet Chatterjee is uniquely qualified to write this text. He is currently the Chief Financial officer of ACCESS Health International, a not for profit organization which is active in Asia, South Asia, Europe, the Middle East and

the Americas. He has written more than ten books on finance and accounting covering a wide range of topics including (International Finance Reporting Standards, Corporate Financial Reporting, Corporate Governance, risk management, financial analysis for decision making and Business Valuation, to name a few). I am pleased to recommend Best Practices for a Global Not for Profit Organization enthusiastically and without reservation.

Cross-Border Bank Resolution - Recent Developments - International

Monetary Fund 2014-02-06
Developing an effective framework for cross-border resolution is a key priority in international regulatory reform. Large bank failures during the global financial crisis brought home the lack of adequate tools for resolving “too-big-to-fail” institutions. In cross-border cases, misaligned incentives and lack of robust mechanisms for resolution and cross-border cooperation left some country authorities with little choice but to take unilateral actions, which contributed to the high fiscal costs of the crisis and resulted in disorderly resolution in some cases
